Chart 4: Direct Investment according to Directional Basis (Net), Q1 2021-Q1 2024

Note: negative value refers to net outflow

Foreign Direct Investment (FDI)

Foreign Direct Investment (FDI) declined from RM19.6 billion to RM5.5 billion in the first quarter of 2024, owing to lower inflows in Equity & investment fund shares and a shift in Debt instruments leading to a net outflow. Most of the FDI flowed into the Services sector, predominantly in Information & communication and Financial activities, followed by the Mining & quarrying and Manufacturing sectors. The major FDI sources were Hong Kong, the USA and Germany.

Portfolio Investment and Other Investment

Portfolio investment recorded a higher outflow of RM23.7 billion as compared to RM6.0 billion in the previous quarter (**Exhibit 2**). NOTA TEKNIKAL | TECHNICAL NOTES

A. PENGENALAN

Statistik Imbangan Pembayaran Malaysia mengukur transaksi ekonomi antarabangsa antara Malaysia dan negara-negara lain di dunia dari segi magnitud dan jenis transaksi dalam akaun semasa, akaun modal dan akaun kewangan. Penyusunan ini selaras dengan metodologi yang ditetapkan dalam Manual Imbangan Pembayaran dan Kedudukan Pelaburan Antarabangsa Edisi Keenam (BPM6) oleh Tabung Kewangan Antarabangsa (IMF).

B. KONSEP DAN LIPUTAN

1. Residen

Residen ialah:

- orang yang tinggal atau menetap di Malaysia bagi tempoh sekurang-kurangnya satu tahun; dan
- syarikat atau institusi yang berada/beroperasi di Malaysia di mana kepentingan ekonominya berpusat di Malaysia.

Satu unit institusi dikatakan mempunyai pusat kepentingan di wilayah ekonomi di sebuah negara apabila wujudnya lokasi seperti bangunan, tempat pengeluaran atau premis lain di mana atau dari mana unit tersebut mengusahakan atau bercadang untuk terus mengusahakan, sama ada untuk tempoh selama-lamanya atau tempoh yang panjang, di dalam aktiviti ekonomi dan dengan skala urusan yang signifikan.

Bukan residen merujuk kepada individu, syarikat atau institusi yang tinggal, atau berada/beroperasi di negara luar Malaysia.

Status residen perwakilan kerajaan asing, organisasi antarabangsa, pelajar asing dan pesakit asing, adalah seperti berikut:

- perwakilan kerajaan asing (kedutaan, konsulat, pangkalan ketenteraan, kerajaan asing) di Malaysia dianggap sebagai pihak luar-wilayah dan dengan itu dianggap sebagai bukan-residen;
- perwakilan kerajaan Malaysia di luar negeri dianggap sebagai residen Malaysia;
- organisasi antarabangsa tidak dianggap sebagai residen bagi mana-mana ekonomi/negara; dan
- pelajar asing dan pesakit asing dianggap sebagai residen negara asal mereka.

2. Sistem Catatan Beregu

Sistem ini berdasarkan prinsip perakaunan yang diterima di peringkat antarabangsa bagi merekodkan dua kemasukan yang sama bagi setiap urusan. Kemasukan kredit untuk merekodkan eksport barangan dan perkhidmatan, pendapatan diterima dan urusan kewangan yang melibatkan pengurangan dalam aset kewangan atau meningkatkan liabiliti. Sebaliknya, kemasukan debit adalah digunakan untuk merekodkan import barangan dan perkhidmatan, pendapatan yang akan dibayar dan urusan kewangan yang melibatkan peningkatan dalam aset atau pengurangan dalam liabiliti.

3. Konsep Pemilikan

Konsep pertukaran pemilikan ekonomi di antara residen dan bukan residen digunakan dalam pengiktirafan transaksi BOP terutamanya bagi akaun barangan dan aset kewangan. Perubahan pemilikan dari sudut ekonomi bermaksud semua risiko, ganjaran, hak dan tanggungjawab pemilikan dipindahkan.

4. Akaun Semasa

Ia mengukur peruntukan bersih sumber sebenar iaitu barangan, perkhidmatan, pendapatan primer dan sekunder kepada atau daripada seluruh dunia. Lebih dalam akaun berlaku apabila pendapatan melebihi perbelanjaan, manakala defisit berlaku jika ia sebaliknya. Defisit dalam akaun semasa mungkin dibiayai oleh aliran masuk pelaburan asing atau pinjaman luar negara atau penggunaan dalam aset rizab.

i. Barangan

Transaksi barangan meliputi import dan eksport di mana pertukaran hak milik ekonomi di antara residen dan bukan-residen. Ia terdiri daripada barang dagangan am mengikut asas BOP, eksport bersih barangan di bawah *merchandise* dan emas bukan monetari.

Barangan dinilai berdasarkan harga pasaran. Secara amnya, nilai pasaran yang dilaporkan oleh pengeksport dan pengimport (untuk perangkaan perdagangan barangan) adalah diukur seperti berikut:

- Eksport f.o.b. merujuk kepada nilai barangan di pasaran di sempadan kastam, termasuk semua kos pengangkutan barangan ke sempadan kastam, eksport dan duti lain yang perlu dibayar, dan juga kos pemunggaran ke atas kenderaan pengangkutan.
- Import c.i.f. merujuk kepada nilai barangan di pasaran di sempadan kastam, termasuk semua caj pengangkutan dan insurans ketika dalam perjalanan tidak termasuk kos pemunggaran daripada kapal, pesawat udara atau kenderaan.
- Bagi penyusunan BOP, kedua-dua eksport dan import dinilai pada f.o.b.

Nilai barangan yang diperoleh daripada pengisytiharan kastam (perangkaan perdagangan barangan) diselaraskan untuk liputan merangkumi urusan pesawat udara dan kapal komersial yang dihantar ke luar Malaysia dan eksport/import air ke/dari Singapura.

Sementara itu, item-item yang dikecualikan daripada barangan am disebabkan tiada pertukaran hak milik adalah:

- barangan untuk proses pemasangan, pembungkusan atau pelabelan (GFP);
- barangan eksport/import untuk penyimpanan sementara;
- barangan untuk pembaikan; dan
- barangan yang dikembalikan.

Merchanting ditakrifkan sebagai pembelian barangan oleh residen daripada bukan-residen dan menjual semula kepada bukan-residen lain tanpa barangan tersebut perlu memasuki Malaysia. Perbezaan antara nilai pembelian dan jualan semula barangan direkodkan sebagai eksport bersih barangan di bawah *merchanting*.

ii. Perkhidmatan

Eksport meliputi perbelanjaan modal dan operasi misi diplomatik asing, misi perdagangan dan organisasi antarabangsa di Malaysia. Import meliputi perbelanjaan modal dan operasi kedutaan Malaysia, suruhanjaya tinggi, misi perdagangan dan jabatan pelajar luar negeri.

iii. Pendapatan Primer

Pendapatan primer meliputi dua jenis transaksi iaitu pampasan pekerja dan pendapatan pelaburan di antara residen dan bukan residen. Pampasan pekerja merujuk kepada upah, gaji dan faedah lain (dalam bentuk tunai atau barangan) yang diterima oleh pekerja residen yang bekerja di luar negeri atau yang dibayar kepada pekerja bukan residen yang bekerja di Malaysia.

Pendapatan pelaburan melibatkan terimaan pendapatan dan pembayaran ke atas aset dan liabiliti kewangan asing.

BPM6 telah menggariskan kategori pendapatan pelaburan sebagai pendapatan pelaburan langsung, pendapatan pelaburan portfolio dan pendapatan pelaburan lain.

Pendapatan Pelaburan Langsung terdiri daripada:

- dividen, iaitu agihan keuntungan atas pemilikan ekuiti enterpris pelaburan langsung;
- remit keuntungan cawangan;
- perolehan dilabur semula, iaitu merujuk kepada perolehan saham langsung pelabur ke atas DIE yang tidak diagihkan. Keuntungan/kerugian saham langsung pelabur yang tidak diagihkan adalah dilihat sebagai penyediaan modal tambahan kepada enterpris; dan
- faedah atas pinjaman dan sekuriti hutang dikalangan syarikat yang berkaitan.

Pendapatan pelaburan portfolio merupakan transaksi pendapatan di antara residen dan bukan residen ekoran daripada pemilikan saham, bon, nota, dan instrumen pasaran wang.

Pendapatan pelaburan lain merangkumi:

- pendapatan sektor awam iaitu Kerajaan Pusat, kerajaan negeri, badan berkanun, Bank Negara Malaysia dan Agensi kerajaan, yang diterima daripada atau dibayar kepada kerajaan asing, bank pusat atau organisasi antarabangsa; dan
- pendapatan sektor swasta seperti faedah daripada pinjaman, deposit dan dll.

iv. Pendapatan Sekunder Pendapatan sekunder meliputi transaksi ekonomi yang tidak berbalas. Ia merekodkan entri pengimbang yang diperlukan dalam sistem catatan beregu dalam BOP, iaitu apabila sumber (barangan, perkhidmatan dan aset kewangan) dibekalkan tanpa menerima balasan yang mempunyai nilai ekonomi.

Pendapatan sekunder adalah diklasifikasikan kepada dua kategori standard utama: kerajaan dan sektor lain yang meliputi pindahan peribadi dan pindahan semasa lain secara tunai (cth. pencen, denda, cukai, hadiah yang dimenangi dari loteri) atau bentuk barangan (cth. hadiah makanan, bekalan perubatan, pakaian).

Jika bukan residen membekalkan sumber kepada residen, item pengimbang kredit diperlukan dan jika sebaliknya, item pengimbang debit diperlukan.

Oleh kerana pindahan berperanan sebagai item pengimbang kepada sumber atau item kewangan yang dibekalkan tanpa balasan, maka nilainya haruslah bersamaan dengan nilai sebenar sumber atau item kewangan yang dibekalkan itu. Pada prinsipnya, pindahan dicatatkan pada ketika sumber yang diimbangnya bertukar milik.

5. Akaun Modal

Akaun modal terdiri daripada dua komponen iaitu perolehan/pelupusan kasar aset bukan kewangan bukan pengeluaran dan pindahan modal.

i. **Perolehan/Pelupusan Kasar Aset Bukan Kewangan Bukan Pengeluaran** Ia terdiri daripada urusan sumber asli (cth. tanah), kontrak, lesen dan pajakan dan aset pemasaran dan muhibah (terdiri daripada jenama, cap dagangan, logo dan nama domain). Item-item tersebut juga dimasukkan dalam perolehan/pelupusan tanah oleh kedutaan asing.

ii. **Pindahan Modal** Pindahan modal adalah entri pengimbang kepada transaksi modal sehalu. Ia termasuk hutang luput, tuntutan insuran bukan hayat, geran pelaburan, jaminan *one-off* dan andaian hutang lain, cukai dan pindahan modal lain.

6. Akaun Kewangan Akaun kewangan mengukur aset dan liabiliti bersih Malaysia kepada negara lain di dunia. Ia diklasifikasikan mengikut kategori fungsi iaitu pelaburan langsung, pelaburan portfolio, derivatif kewangan, aset rizab dan pelaburan lain. Akaun kewangan mencerminkan bagaimana lebihan dalam akaun semasa digunakan atau bagaimana defisit dibiayai. Oleh itu, lebihan mungkin dicerminkan oleh pelaburan luar negeri atau pemberian pinjaman ke luar negeri atau pengumpulan aset rizab.

Aset kewangan asing dan liabiliti tanggungan adalah tuntutan oleh residen kepada satu ekonomi terhadap residen ekonomi lain. Kewujudan tuntutan tersebut, walau bagaimanapun, secara umumnya akan direkodkan di dua lembaran imbalan, iaitu lembaran imbalan penghantar dimana tuntutan terhadapnya diadakan sebagai liabiliti, dan lembaran imbalan kepada pemegang tuntutan yang akan merekodkan urusan sebagai aset.

i. **Pelaburan Langsung** Pelaburan langsung ialah kategori pelaburan antarabangsa yang mencerminkan objektif entiti residen dalam sesebuah ekonomi memperoleh hak kepentingan jangka panjang di dalam enterpris residen ekonomi lain. Hak kepentingan jangka panjang merujuk kepada wujudnya hubungan jangka panjang di antara pelabur langsung dengan enterpris pelaburan langsung dan mempunyai kuasa dalam pengurusan enterpris tersebut. Pegangan sekurang-kurangnya 10 peratus dalam enterpris ialah sebagai bukti wujudnya hubungan tersebut. Pelaburan langsung meliputi semua transaksi di antara pelabur langsung dengan enterpris pelaburan langsung dalam Hubungan Pelaburan Langsung Asing (FDIR). Instrumen kewangan yang diliputi di bawah pelaburan langsung termasuklah ekuiti, perolehan dilabur semula dan instrumen hutang (seperti pinjaman dan pendahuluan antara syarikat, kredit perdagangan).

Berdasarkan asas aset dan liabiliti, aset merujuk kepada semua pelaburan di luar negeri bagi kedua-dua pelabur langsung dan enterpris pelaburan langsung di Malaysia, sementara liabiliti merujuk kepada semua pelaburan di Malaysia bagi kedua-dua pelabur langsung dan enterpris pelaburan langsung di luar negeri.

Berdasarkan asas prinsip arah aliran, DIA diperoleh daripada perbezaan antara aset pelabur langsung Malaysia dengan liabilitinya, sementara FDI diperoleh daripada perbezaan antara liabiliti enterpris pelaburan langsung Malaysia dengan asetnya.

ii. **Pelaburan Portfolio** Pelaburan portfolio melibatkan urusan antarabangsa dalam sekuriti ekuiti

(cth. saham) dan sekuriti hutang (cth. bon dan nota, sukuk dan instrumen pasaran wang), selain daripadanya termasuk dalam pelaburan langsung dan aset rizab.

iii. Derivatif Kewangan

Instrumen kewangan yang dihubungkan dengan instrumen kewangan lain atau petunjuk atau komoditi, dan mempunyai risiko kewangan tertentu (seperti risiko kadar faedah, risiko mata wang, risiko harga ekuiti dan komoditi, risiko kredit dll.) yang boleh diniagakan secara berasingan di pasaran kewangan. Contoh derivatif kewangan ialah opsiyen (termasuk waran), niaga hadapan, kontrak hadapan dan *swap*.

iv. Pelaburan Lain

Merujuk kepada pelaburan selain daripada pelaburan langsung dan pelaburan portfolio yang terdiri daripada mata wang & deposit, pinjaman yang dikaitkan dengan pajakan kewangan, kredit perdagangan dan pendahuluan tanpa mengira tempoh pembayaran balik, dan akaun lain yang belum terima/bayar. Urusniaga pelaburan lain berlaku di antara residen dan pihak yang tidak berkaitan dengan bukan-residen. Sebarang urusniaga di bawah pelaburan langsung adalah dikecualikan.

v. Ekuiti dan Dana Pelaburan Saham

Terdiri daripada semua saham dalam syarikat subsidiari dan bersekutu, serta sumbangan lain (barangan, perkhidmatan dan sumber lain). Kesemua saham yang dikeluarkan termasuklah saham biasa, saham premium dan saham keutamaan yang mempunyai hak mengundi.

vi. Perolehan Dilabur Semula

Pendapatan mengikut peratusan pemilikan ekuiti yang dipegang oleh pelabur langsung yang tidak diagihkan sebagai dividen tetapi sebaliknya dilaburkan semula ke dalam enterpris tersebut.

vii. Sekuriti Hutang

Sekuriti hutang termasuk bon, debentur, nota kewangan, nota janji hutang dan lain-lain sekuriti bukan-ekuiti yang boleh diniagakan, dan biasanya diniagakan (didagangkan) dalam pasaran kewangan yang teratur.

viii. Matawang dan Deposit

Matawang terdiri daripada nota dan syiling yang mempunyai nilai tetap nominal dan dikeluarkan atau disahkan oleh bank-bank pusat atau kerajaan. Deposit merujuk kepada semua jenis deposit di bank seperti akaun simpanan, akaun semasa, akaun tetap dan deposit masa lain.

ix. Pinjaman

Termasuk semua pinjaman dan pendahuluan (kecuali akaun belum terima/bayar). Ia juga meliputi pajakan kewangan dan perjanjian pembelian semula.

x. Kredit Perdagangan dan Pendahuluan

Merujuk kepada kemudahan kredit yang diberikan oleh pengeksport kepada pengimport bagi barangan dan perkhidmatan (tidak termasuk *Letter of Credit*). Kemudahan kredit ini biasanya mempunyai tempoh matang kurang daripada tiga bulan.

Pendahuluan merujuk kepada pendahuluan bagi kerja yang sedang dilaksanakan (atau yang akan dilaksanakan) di mana pelanggan belum membuat bayaran pendahuluan bagi barangan dan perkhidmatan tersebut.

xi. Lain-lain Akaun Belum Terima/Bayar

Termasuk semua akaun lain yang belum terima/bayar selain daripadanya termasuk dalam kredit perdagangan dan pendahuluan atau instrumen lain

yang terakru tetapi belum dibayar.

7. Aset Rizab

Aset rizab merujuk kepada tuntutan BNM terhadap bukan residen bagi memenuhi keperluan BOP. Berdasarkan kepada manual BPM6, perubahan dalam harga pasaran dan kadar pertukaran wang asing bagi aset rizab perlu dikeluarkan daripada penyusunan BOP. Oleh itu, bagi memenuhi praktis antarabangsa dan menambahbaik perekodan aset rizab dalam penyusunan, keuntungan atau kerugian dikeluarkan daripada data *flow* mulai penerbitan suku pertama 2018.

Aset rizab ini terdiri daripada pegangan BNM terhadap SDR, Kedudukan dana rizab Malaysia, emas & tukaran asing dan sumber IMF.

SDR – SDR ialah aset yang diwujudkan oleh IMF untuk memenuhi keperluan global apabila ia diperlukan. Ia diwujudkan sebagai tambahan kepada aset rizab yang sedia ada.

Kedudukan Rizab IMF – Kedudukan rizab Malaysia di IMF dirujuk dalam terma SDR, yang mencerminkan urusniaga dengan IMF dalam suatu tempoh. IMF akan membenarkan Malaysia untuk membeli SDR atau matawang negara lain sebagai pertukaran kepada Ringgit. Pembelian (atau pengeluaran) matawang negara lain daripada IMF menyebabkan kedudukan rizab Malaysia di IMF akan berkurangan sebaliknya penjualan semula (pembayaran balik) akan menyebabkan kesan sebaliknya.

Emas & Tukaran Asing – Pegangan emas merujuk kepada emas monetari yang dipegang oleh BNM. Rizab pertukaran asing yang dipegang biasanya dalam bentuk mata wang utama digunakan untuk tujuan bayaran perdagangan. Rizab ini juga diperlukan dalam memenuhi keperluan permintaan matawang asing, daripada residen dan bukan residen, yang bukan hanya untuk pembayaran perdagangan tetapi juga untuk pembayaran perkhidmatan, pelaburan dan pembayaran lain.

Sumber IMF – IMF mengekalkan sumber kewangan yang besar bagi membiayai ketidakseimbangan sementara Imbangan Pembayaran atau kedudukan rizab negara ahlinya. Sumber ini bersifat pusingan dan ia diwujudkan daripada matawang negara ahli sebagai kuota langganan. IMF boleh menambahkan sumber tersebut melalui pinjaman.

8. Kesilapan dan Ketinggalan Bersih

Kesilapan dan ketinggalan bersih berlaku disebabkan terkurang atau terlebih anggaran pada setiap item dalam BOP. Perbezaan terjadi berikutan penggunaan pelbagai sumber data dalam penyusunan, perbezaan masa perekodan dan faktor penilaian harga (keuntungan atau kerugian atas tukaran wang asing).

C. SUMBER DATA

Penyusunan Anggaran Imbangan Pembayaran menggunakan sumber data berikut:

(I) Sumber Primer:

- Survei Kedudukan Pelaburan Antarabangsa – usaha sama antara BNM

dan Jabatan Perangkaan Malaysia;

- Survei Perkhidmatan Antarabangsa yang dijalankan oleh Jabatan; dan
- Survei Perbelanjaan Residen Malaysia di Bandar Sempadan yang dijalankan oleh Jabatan.

(II) Sumber Sekunder:

- Perangkaan pelancongan yang disusun oleh Lembaga Penggalakan Pelancongan Malaysia berdasarkan Penyiasatan Pemergian Pelawat dengan data tambahan daripada Jabatan Imigresen;
- Sistem Transaksi Maklumat Antarabangsa (ITIS) BNM; dan
- Rekod pentadbiran sektor awam dan swasta - sektor awam merujuk kepada rekod pentadbiran oleh lain-lain agensi kerajaan, Jabatan Akauntan Negara, Jabatan Kastam Diraja Malaysia, Kementerian Pertahanan, Kementerian Luar Negeri, dsbnya.

D. AMALAN DATA AWALAN DAN SEMAKAN

Amalan yang digunapakai oleh Jabatan Perangkaan Malaysia bagi keluaran data awalan dan data disemak ialah:

- Data awalan dikeluarkan selepas tujuh minggu selepas suku tahun rujukan;
- Data disemak bagi tahun sebelumnya akan diterbitkan pada suku pertama tahun semasa; dan
- Data akhir akan diterbitkan setahun selepas data disemak diterbitkan.

Semakan adalah disebabkan oleh pelaporan dan maklumat terkini oleh pembekal data.

E. PEMBUNDARAN

Sebarang perbezaan pada data yang dilaporkan adalah disebabkan oleh pembundaran.

A. INTRODUCTION

Malaysia's Balance of Payments statistics measure the international economic transactions between Malaysia and the rest of the world in terms of magnitude and types of transactions in current, capital, and financial accounts. The compilation is in accordance with the methodology set forth in the Sixth Edition of the Balance of Payments and International Investment Position Manual (BPM6) of the International Monetary Fund (IMF).

B. CONCEPT AND COVERAGE

1. Resident

A resident is:

- a person who has stayed or lived in Malaysia for at least one year; and
- a company or institution located/operating in Malaysia where its centre of predominant economic interest is in Malaysia.

Centre of predominant economic interest of an institutional unit in an economic territory existed where some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

A non-resident refers to a person, company or institution that lives in, or is located/ operating in a country outside Malaysia.

Residency status of foreign official representatives, international organizations, foreign students and medical patients, are as follows:

- foreign official representatives (embassies, consulates, military bases, foreign general government) in Malaysia are considered as extra-territorial and, therefore are treated as non-residents;
- Malaysia's official representatives abroad are treated as residents of Malaysia;
- international organisations are not considered as residents of any economy/country; and
- foreign students and foreign patients are treated as resident of their country of origin.

2. Double Entry System

A system that follows the internationally accepted accounting principle of recording two equal entries for each transaction. Credit entries are used to record exports of goods and services, income receivable and financial transactions involving reductions in financial assets or increase in liabilities. Conversely, debit entries are used to record imports of goods and services, income payable and financial transactions involving increase of assets or decrease in liabilities.

3. Ownership Concept

The concept of change of economic ownership between a resident and non-residents is used in recognizing BOP transactions particularly in goods and

financial assets. A change in ownership from economic point of view means that all risks, rewards and rights and responsibility of ownership in practice are transferred.

4. Current Account

It measures net provision of real resources namely goods, services, primary and secondary income to or from the rest of the world. A surplus in current account arises when earnings exceed spending, while a deficit occurs when it reversed. A deficit in the current account may be financed by foreign investment inflows or external borrowings or a draw downs on reserve assets.

i. Goods

Transactions of goods cover imports and exports which economic ownership is changed between residents and non-residents. It consists of general merchandise on a BOP basis, net exports of goods under merchanting, and nonmonetary gold.

The goods are valued at market price. Generally, the market value reported by exporters and importers (for merchandise trade statistics) are measured as follows:

- Exports f.o.b. refer to the value of the goods in the market at the customs frontier, including all costs of transporting the goods to the customs frontier, exports and other duties payable as well as the cost of loading the goods onto the carrier.
- Imports c.i.f. refer to the value of the goods in the market at the customs frontier, including all charges for transport and insurance whilst in transit but excluding the cost of unloading from the ship, aircraft or vehicle.
- For the BOP compilation, both exports and imports are valued at f.o.b.

The value of goods as obtained from customs declarations (merchandise trade statistics) is adjusted for coverage to include transactions of commercial ships and aircrafts, which are delivered outside Malaysia and exports/imports of water to/from Singapore.

While, items to be excluded from general merchandise on a BOP basis due to no change of ownership are:

- goods for processing, assembly, packing or labelling (GFP);
- goods temporarily exported/imported for storage
- goods for repair; and
- returned goods.

Merchanting is defined as purchase of goods by a resident from a non-resident combined with the subsequent resale to another non-resident without the goods being present in Malaysia. The difference between the purchase and resale values of the goods is recorded as net exports of goods under merchanting.

ii. Services

Services are the result of a production activity that changes the conditions of the consuming units, or facilitates the exchange of products or financial assets. Services are not generally separate items over which ownership rights can be established and cannot generally be separated from their production.

a. Manufacturing Services on Physical Inputs Owned by Others

Recognition of this services are parallel with the treatment of exclusion goods for processing (with no change of ownership) from goods account. It covers fees charged by the processor to owner of the goods for manufacturing activities done (i.e., processing, assembly, packing or labelling).

b. Maintenance and Repair Services n.i.e.

Includes maintenance and repair works by residents on goods owned by non-resident (and vice versa). The repairs may be performed at the site of the repairer or elsewhere. Maintenance and repairs on ships, aircraft and other transport equipment are included.

Exclude:

- *Cleaning of transport equipment (included in transport services);*
- *Construction repairs and maintenance (included in construction); and*
- *Maintenance and repairs of computers (included in computer services).*

c. Transport

Transport covers all modes of transportation namely sea, air, other modes (including land, internal waterway and pipeline) and postal and courier services. It involves the carriage of passengers, freight (movement of goods) and related supporting and auxiliary services. Supporting activities and auxiliary services exclude rentals (charter hire) of carriers without crew are included in other business services.

(I) Passenger Services

- a). Passenger services relates to the service performed in the international transport of people. Other services for which passengers make expenditures on board carriers or for which they pay charges to carriers, such as those for excess baggage or other personal accompanying effects are also included.*
- b). In order to avoid practical difficulties in determining the residency of passengers, the convention is adopted whereby passenger fares sold within Malaysia are deemed to be sold to residents. Likewise, passenger fares sold in foreign countries are deemed to be sold to non-residents.*

(II) Freight Services

- a). This item covers transportation and distributive services which are performed by:*
 - *residents on merchandise and most other movable goods acquired or owned by non-residents (on Malaysia's exports); and*

- *non-residents on merchandise and most other movable goods acquired or owned by residents (on Malaysia's imports).*
- b). *Transport of goods is always considered to begin at the customs frontier of the exporting country. The main purpose of specifying a convention is to provide a basis for recording the transport of goods, consistent with a uniform free on board (f.o.b.) valuation basis for the goods component. The procedures for compilation are as follows:*
- *to enter as exports all services performed by residents on Malaysia's/ other countries' exports, once these have been loaded on board the carrier at the customs frontier of Malaysia/other countries from which the goods are being exported; and*
 - *to enter as imports all services performed by foreign residents on Malaysia's imports, once these have been loaded on board the carrier at the customs frontier of the country from which they are imported.*
- c). *Freight payments to non-resident shipping and airline companies for services rendered in connection with Malaysia's imports. Freight earnings by resident carriers for the carriage of Malaysia's imports are excluded based on the underlying conventional assumption that all freight expenses incurred on imports are borne by residents.*

(III) Other Transport Services

- a). *Refer to port and airport services relating to the procurement of services by shippers/carriers for activities such as cargo handling, airport/port fees, pilotage and towage. Storage and warehousing services are also classified in this item.*
- b). *Other related services performed by shippers/carriers and similar equipments such as towboats, tugboats and salvage operations also form part of this component.*

(IV) Postal and Courier Services
